Ingredient Sustainability

DIRECTIONS:
In the last lesson, you identified ingredients to include in your trail mix product. Now, you are going to select three of these ingredients that you identified (on the map) and learn more about the **sustainability practices** that are utilized when producing those three products. Using what you have learned, research each ingredient and the **sustainable production process** each goes through. Be sure to call out the specific sustainability practices, standards, certifications and/or regulations the ingredient goes through. Some resources to help you get started:

The opportunities with Supervised Agricultural Experiences (SAEs) are truly limitless, designed to align with students' passions and career aspirations. Starting with a Foundational SAE, students lay the groundwork for their agricultural journey, which they can later elevate through Immersion SAEs. These immersive experiences provide an incredible chance for students to build on foundational activities with real-world, hands-on engagement in their chosen career paths.
